ABOUT US

The existence of the Department of Ship Mechanical Engineering, more than 35 years of existence, has produced many qualified mechanical engineering study programs and alumni. The study programs include ME, DM, TP, K3, and PL. and the alumni have spread evenly throughout the regions in Indonesia. In a career journey, there are many things that need to be owned by Active Students and Alumni both in terms of soft skills and hard skills, the most important thing when graduating later is about planning, conceptualizing, and developing a business idea. The Marine Preneur Competition 1st will answer the need for this

Marine Preneur Competition 1st is a competition in the field of entrepreneurship held by IKA TPK PPNS. Where participants are required to create a "Business Plan", starting from making product designs to selling prices and marketing plans. In a series of Marine Preneur Competition 1st activities, there are supporting activities, namely the Marine Industrial Expo and National Seminar "The Power of Growth Mindset". Where these activities can be attended by PPNS Active Students and the public.

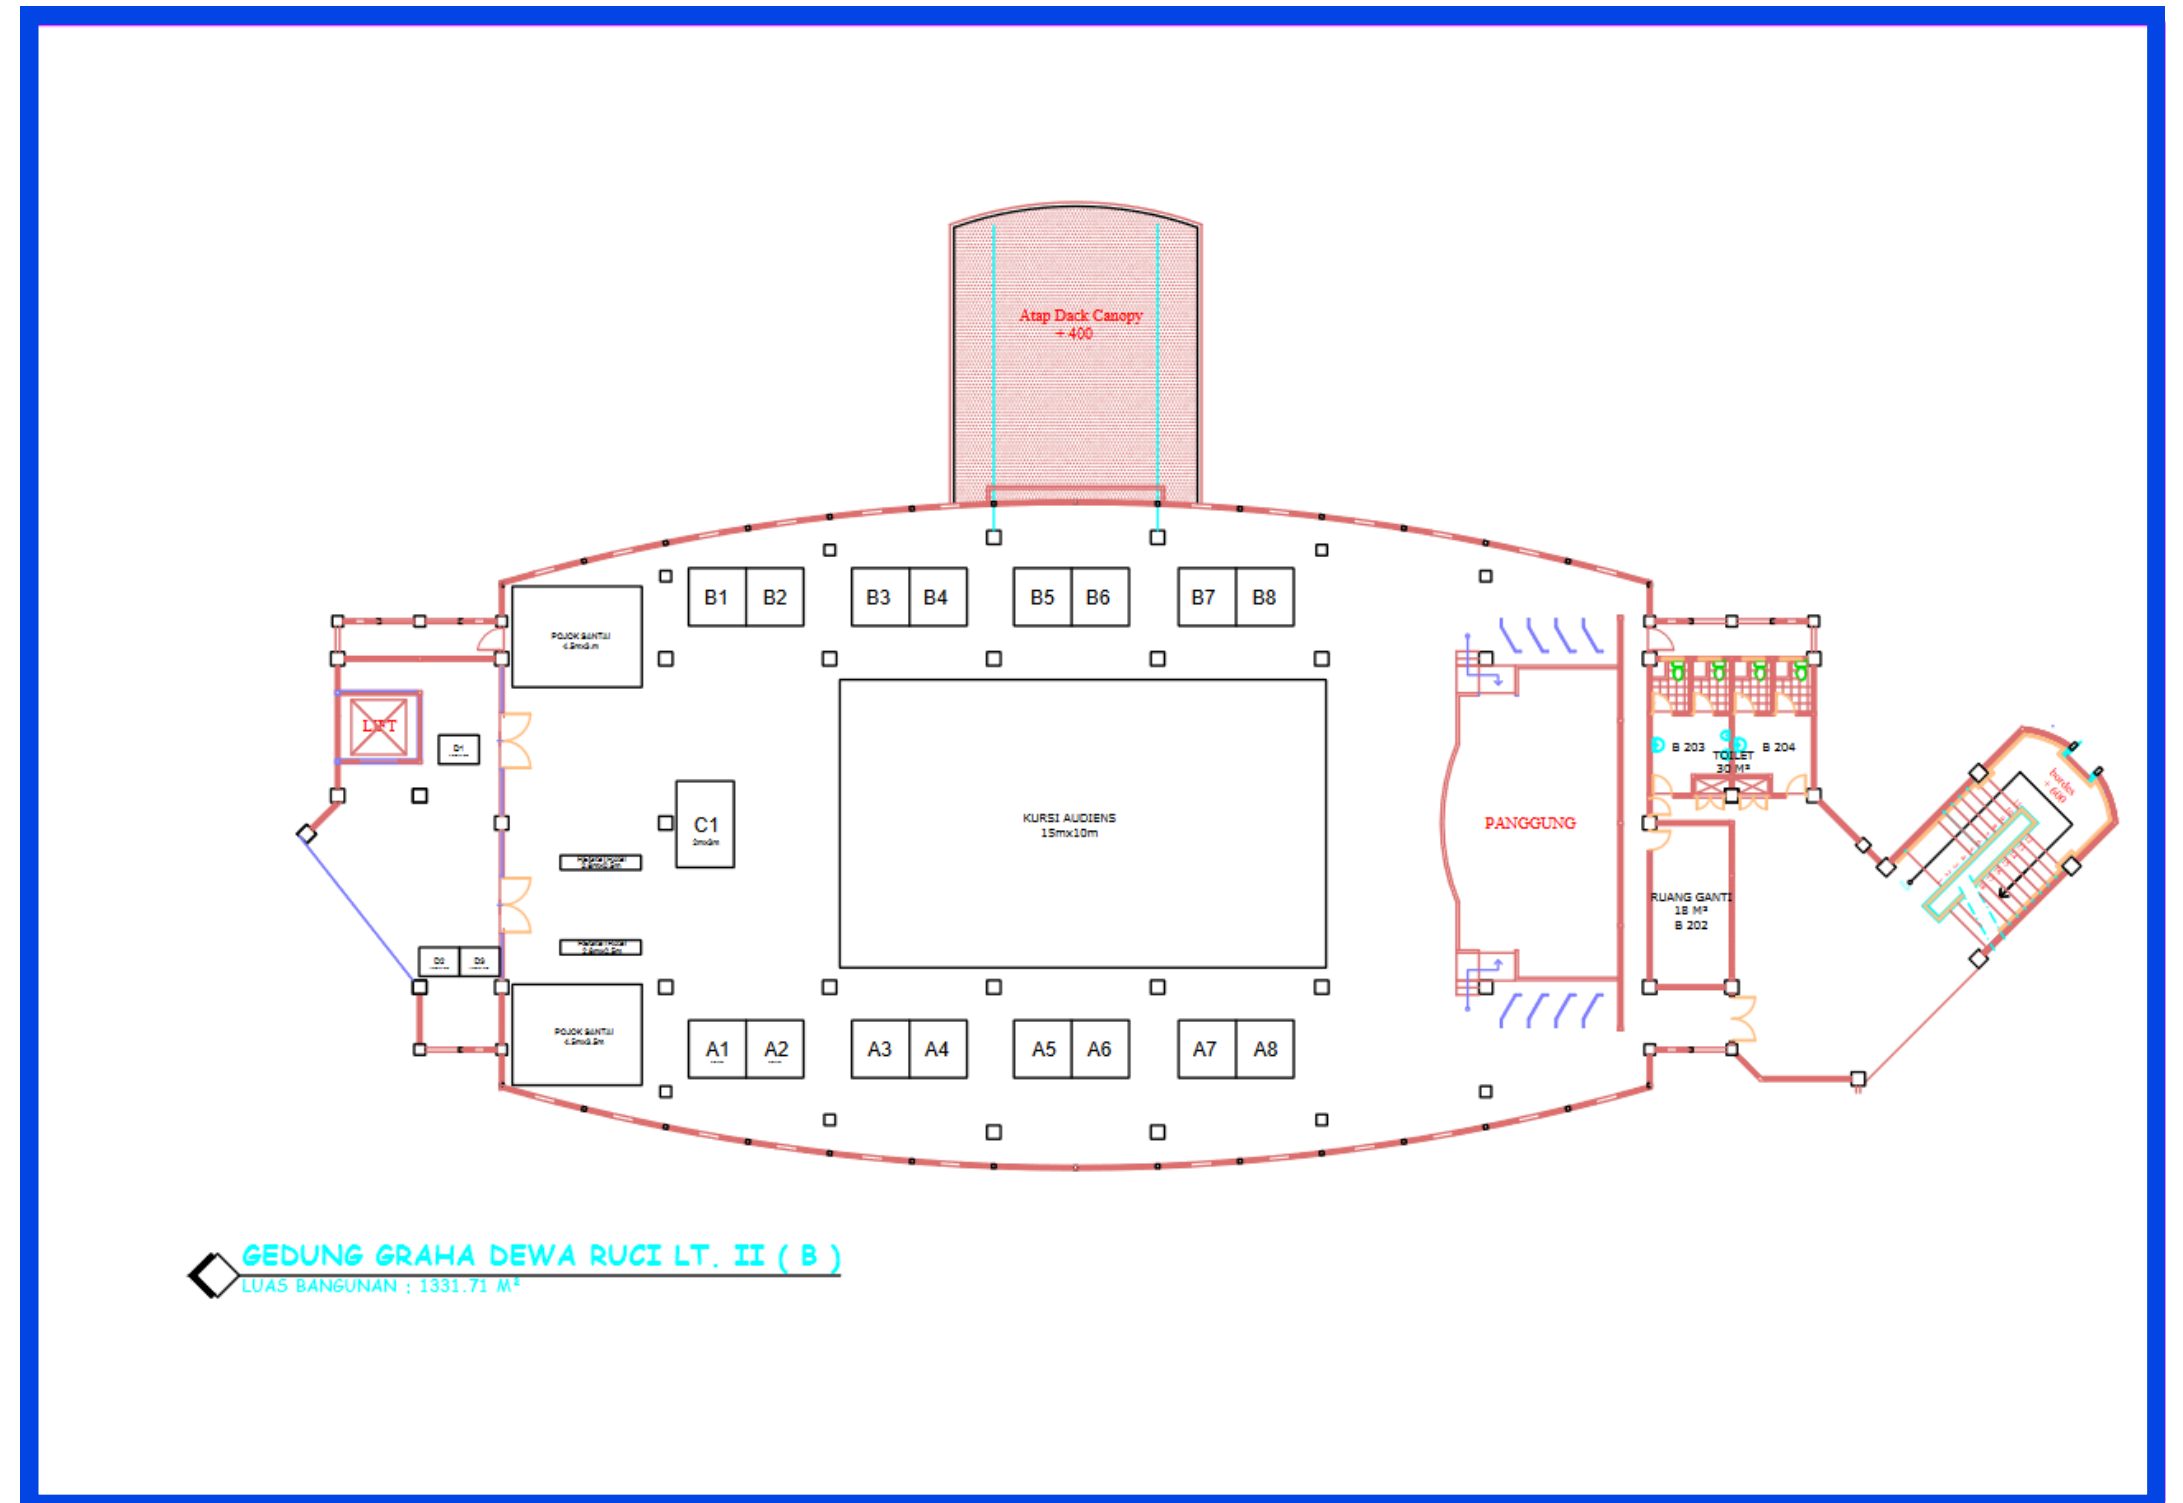

The Marine Industrial Expo is an exhibition event open to the maritime, shipping, and other industries. The event is expected to attract participants from various industry sectors, including shipbuilding companies, maritime technology, logistics service providers, and much more to meet the local industries' needs in Indonesia. The exhibition will be held for two days with a total of 15 booths will not only showcase the latest technology, but also provide networking opportunities. By putting all the shows together, it will be deliver a synergistic effort among the industries to attract an event bigger participation for both exhibitors

WHERE

The Marine Industrial Expo will be held at Grha Dewaruci, which is located in the campus area of Shipbuilding Institute of Polytechnic Surabaya.
